FULL STACK DEVELOPER

I am a fullstack software engineer with an eye for UX design. I am a big picture thinker with an attention to detail. My experience completing my first album taught me the importance of leadership, collaboration, and seeing a project through to fruition, which allows me to give and receive feedback effectively when working with other developers. I want to inspire people to learn and grow through engaging software.

SKILLS

Languages: HTML, CSS, JavaScript, Python, JSON
Libraries and Frameworks: jQuery, JSON, ExpressJS, React, Flask, FastAPI,
Databases and other: MongoDB, PostgreSQL
Interpersonal skills: Communication, teamwork, critical thinking, adaptability, leadership, creativity

TECHNICAL PROJECTS

Simple Dictionary - GitHub | Simple Dictionary - Javascript | jQuery | HTML | CSS
Project Manager
A dictionary app that provides users with the word, part of speech, and a short definition according to their search entry.
- Incorporated data from Merriam Webster Dictionary API into a functional search feature to create a simplified dictionary search app
- Built app with HTML, CSS, Javascript, and jQuery in order to successfully deployed interactive site
- Implemented responsive CSS design for app use on mobile devices

06/2023

Simple Journal - GitHub | Simple Journal - Javascript | HTML | CSS | ExpressJS | MongoDB
Project Manager
A journaling app that lets users create, view, update, and delete entries.
- Designed app using RESTful architecture to define routes and their functionality within the app, and giving users the ability to create, read, update, and delete entries
- Incorporated MongoDB into backend codebase in order to store the app's data
- Built app using ExpressJS framework, Javascript, HTML, and CSS

07/2023

Travelog - GitHub | Travelog - MongoDB | Express | React | Node.js
Product Manager
A travel diary site where users can view, post, edit, and delete posts that include information about places they've traveled to.
- Worked with two other developers as part of a team to build a travel diary site using JavaScript within the React library
- Our backend API was built within an Express framework in a Node environment, using Mongoose to connect to our Mongo database
- Responsive design implemented using SCSS

Personal Website - GitHub | App - HTML | CSS
A portfolio website for my personal writing and music projects.
- Designed and built a portfolio website using HTML and CSS which includes audio streaming as well as PDF document viewer to showcase personal music and writing projects

EXPERIENCE

Project Most, Counselor   *East Hampton, NY, 09/2022 - 10/2022*
- Led a chess class at an afterschool program for groups of up to 20 elementary school students, resulting in students gaining a foundational understanding of the game as well as a desire to play and learn more
- Delegated tasks to other instructors to cultivate a safe and fun learning environment, successfully allowing staff to give attention to students while minimizing safety concerns
- Took on additional role of leading a new creative writing program for students which fostered a safe and encouraging environment for many students to express themselves creatively through writing

Arnold S. Warwick & Co., Ltd., Assistant Managing Agent   *New York, NY, 05/2018 - 01/2020*
- Audited monthly financial reports for approximately 100 properties to ensure that expenses on each account matched our invoice records, allowing for accurate, transparent records as well as informing company decisions regarding spending
- Delivered financial reports to property board members and accountants regularly, and corresponded with them to handle any extraneous requests regarding property records, which established and maintained trust and communication between our company and our clients
- Maintained an organized chronological filing system, allowing for seamless retrieval of company data such as bank records, invoices, and financial reports, which allowed day to day operations of our company to run smoothly
- Deposited checks weekly at the bank ranging from $500 to $20,000 in order to make payments on behalf of the company

EDUCATION

General Assembly   *Remote, Certificate Expected: 10/2023*
Software Engineering Immersive - Certificate of Completion
Full-stack software engineering 420+ hour program focused on product development fundamentals, object-oriented programming, MVC frameworks, data modeling, and team collaboration strategies.

Pitzer College, Bachelor of Arts in Psychology   *Claremont, CA, 2018*
